Revert Changes

System Requirements Specification

1 PROJECT ABSTRACT

This document outlines the structure for a **Revert Changes git assessment** designed to evaluate the candidate's proficiency in using Git commands, integrating these commands within a Java application, and managing the build process with Maven. The assessment involves executing specified Git commands, verifying their correctness through a Java application, and using Maven to build and test the application.

2 ASSESSMENT OBJECTIVES

The objective of this assessment is to test the candidate's ability to utilize git commands effectively with a project environment.

3 ASSESSMENT TASKS

1. Initialize an empty git repository.
2. Set up global config with your email ID and name.
3. Create a file called history_file.txt with the content "first line".
4. Add history_file.txt and commit with message "first commit".
5. Create a branch named feature_branch and switch to it.
6. Add a new line with content as "second line" in history_file.txt.
7. Add history_file.txt and commit with message "second commit".
8. Add a new line with content as "third line" in history_file.txt.
9. Add history_file.txt and commit with message "third commit".
10. Switch back to the main branch.
11. Merge the feature_branch into main.
12. Revert the most recent commit (which is the third merge commit created in the 10th step).

4 EXECUTION STEPS TO FOLLOW

1. To open the command terminal, you need to go to the Application menu (Three horizontal lines at left top) -> Terminal -> New Terminal and then change the path to utils folder.
2. Once you perform all tasks, please open another terminal with the root address (path with project name).
3. To run your project use command:

mvn clean install exec:java -Dexec.mainClass="mainapp.MyApp" -DskipTests=true

4. To test your project, use the command

mvn test

5. These are time bound assessments the timer would stop if you logout and while logging in back using the same credentials the timer would resume from the same time it was stopped from the previous logout.
